OMBRE/MICROBLADING COMBO AFTERCARE INSTRUCTIONS:
DAY 1-4: After the procedure for the first hour continue to dab with clean tissue or cotton every 15-20 minutes, then after that gently wash(tapping motion) or blot the brows with a mixture of gentle baby soap and water to remove excess lymph fluid. Continue to wash every 30-60 minutes for a total of 4 times or until lymph fluid subsides. Do not apply ointment after each wash. Dry gently with clean cloth or tissue. After washings have been completed, apply a tiny amount(half a rice grain size) of the aftercare ointment using a Q-tip right after your last wash and before bed. Please use one end for each brow to avoid cross contamination. Repeat the next day.
DAY 5-Until scabbing has finished: No more washing, dab the brows with clean wet cotton rounds twice a day. Apply a thin layer of ointment onto brows using a Q-tip for each brow to avoid cross contamination. A VERY THIN LAYER(half a rice grain size). You should have some left for your 2nd session Touchup. If lost, substitute with Aquaphor healing ointment.
Ointment for Dry or Normal skin type: Apply ointment 3-4 times a day. - Ointment for Combo or Oily skin type: Apply ointment 1-2 times a day.
(If you are still scabbing after 2 weeks, return to normal routine but continue to apply ointment. If you did not scab, stop ointment in 2 weeks.)

NANO BROW PROCEDURE AFTERCARE: Recommended dry healing process, first hour after procedure continue to gently dab brows with clean cotton or tissue every 10-15 minutes then after that please leave the brows alone to heal, keep brows clean from dirt, dust, bacteria, excess sweat or water and skin care. Do not pick at brows if scabbing begins. Gently blot the brows with clean cotton or tissue and spring water can be added if needed. Please do NOT apply any ointments unless directed

WHAT TO AVOID:

- Please keep brows away from water unless cleansing, sweat, and direct sunlight. Avoid the sauna, tanning bed, gym, pools, ALL active skincare ingredients.
- Do not apply vaseline or Neosporin
- Always wash your hands thoroughly with antibacterial soap before applying ointment. Do not touch brows at all with your fingers.
- Limit your shower time. Do not face the shower head. Be very careful to stick the visor(if given) on brows. If at any time brows become soaked with water gently blot dry them immediately.
- Regular make up can be worn just NOT on the treated area until the scabbing stage is completed.
- DO NOT pick or scratch at scabs. Let the scabs fall off naturally. Picking can cause loss of pigment or scarring.
- No hair, pillow or glasses touching the brows
- Do not sleep on your face or sides until healed.
- Avoid all facial treatments or lasers for 4 weeks.
- No lash extensions or lash treatments for 2 weeks.
